

Protocol for the Protection of Biodiversity:

In the social and cultural commitment of the Hotel Grand Teguisse Playa to Biodiversity, we mark the following protocol of action in our aim to adopt an ecosystem approach to pursue the objective of the management of the hotel's impacts associated with biodiversity, trying to achieve a global positive contribution and demanding in the same way to subcontracted companies the adoption of the following principles:

- ✓ Fulfillment of the legislation in force.
- ✓ Environmental responsible business and preventive approach that favors the environment
- ✓ Development and diffusion of environmentally-friendly technologies
- ✓ Design in harmony with nature and adoption of solutions for the integration of the natural environment, enhancing it, to reduce the visual impact and optimizing the integration of cultural identities
- ✓ Respect, involvement and support for local communities
- ✓ Development of collaborations with institutions and organizations responsible for conservation.
- ✓ Promotion in the design of gardens and the hotel grounds of the use of indigenous or culturally appropriate naturalized plants, perfectly adapted to the climatic conditions, which reduces the maintenance and use of water and chemical fertilizers, pesticides and herbicides that represent a threat for biodiversity, likewise the use of non-threatened species, also avoiding the introduction of potentially invasive exotic species.
- ✓ Promotion of the use of natural materials from sustainable sources, which reduce the modification of the landscape

Costa Teguisse, June 2016

Adolfo de la Rúa
General Director Hotel Grand Teguisse Playa
